

## Wearer Tips for Maximizing Amazon Employee Comfort

### 1 Select a Loose Fitting Jacket Size

DO

Wear a Jacket ONE SIZE LARGER than you typically Wear. . . This allows Air Circulation from below the jacket to the upper body. . . helps keep you Cool.

Rule of Thumb: **Looser = Cooler**

DON'T

Wear a Tight-Fitting Jacket because it is "More Flattering".

### 2 Consider the Fabric Content of Tops Worn Under the Jacket

DO

Wear **Lightweight 100% Cotton** or **Moisture Wicking** Tops under the Jacket. . .

Cotton and Moisture Wicking Tops will make you Cooler

DON'T

Wear Tops Made of **Synthetic Fabrics** under the Jacket. . . i.e. Rayon, Nylon or Polyester, including Blends of Polyester/Cotton.

Rule of Thumb: **Other than DenLine DL361A Lab Jackets**, made of proprietary lightweight yarns tested Air Permeable 35 CFM ( Cubic Ft./Min), comparable to a 65/35 Polyester/Cotton Blend. . . Synthetic Tops NOT labeled or advertised as being breathable are NOT Recommended.
